## DECORATIVE LIGHT FILTERS

**#StimulateYourMindWithColour...inJoyfulCircles!\***

## Creating some *beautiful* natural colour stimulus indoors...just like 'The Great Outdoors'

The colourful 'Outdoors' had been our everyday happy environment for many thousands of years throughout our long evolution; prior to us all coming *indoors* only a few hundred years ago!

In more recent times, the global film industry has actually been well-aware of this positive influence that Colour has on our minds, when making movies to entertain us all, *indoors*. Consequently, they use it subtly in the lighting of different scenes to help stimulate various moods & feelings for our enjoyment when we're at the cinema, (*See website for details*).

You can now create an attractive & positive environment **Anywhere, Everyday**; very easily with these innovative **DECORATIVE LIGHT FILTERS** with similar joyful colours & tones as used on many film sets. This being when simply added to standard, new, plain white, LED Luminaires either prior to them being fitted in number across a suspended ceiling; or, on a retrofit basis to existing fitted luminaires with a suspended *or* solid ceiling, (or wall?).

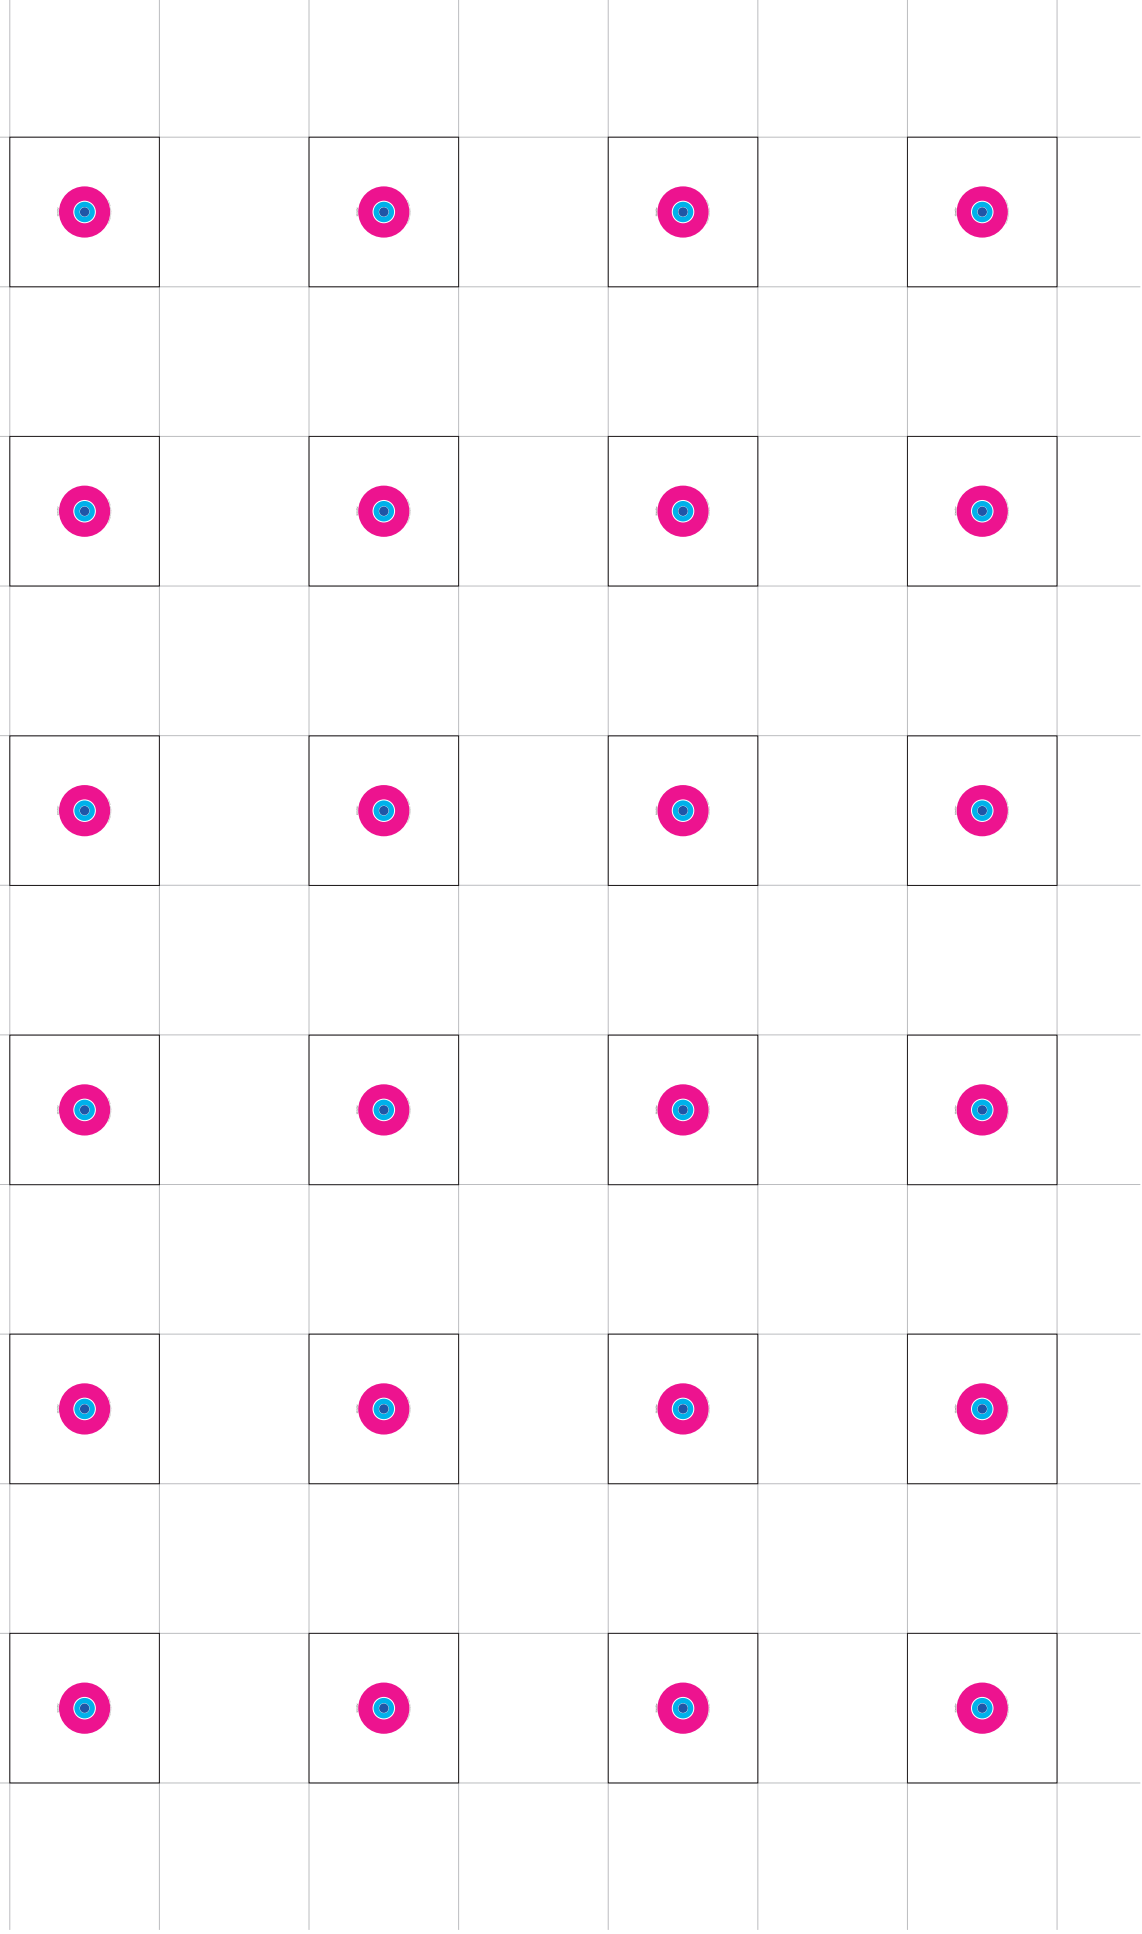

(In Offices, Schools, Hospitals & other medical sites, Sports clubs, Retail Outlets, etc.)

**NOTE:** Simply Google – '**Stimulate Your Mind with Colour**', and also – '**Why Do We Like Circles?**' to learn about why this particular design was created for the new product?
